16.Parts List Breakdown	Attached

1. SERIAL NUMBER LOCATION

The model/serial number decal is located on the shroud assembly (black).

(Write model number)

(Write serial number)

The unit's year of manufacture can be determined by the serial number. Contact your nearest sales branch or for more information.

This Unit warranty is stated in this Operational and Safety manual on page 16. Failure to return warranty registration card renders the warranty null and void.

An engine owner's manual is also attached to every unit. Engine parts may order from any authorized dealer. Refer to the engine owner's manual lo learn about specifications and part identification.

2. PARTS ORDERING PROCEDURE:

Parts are available worldwide and must be ordered through your local distributor. If you can't locate the distributor in your area refer to page 17 of this manual to locate the nearest branch and contact numbers for assistance.

Grinders are intended for use in several applications. They are powered by four stroke gas engines or electric motors and are available in different sizes and manufacturers.

This Operation manual contains only standard parts. Variations of these parts as well as other special parts are not included. Contact your local **action** distributor for assistance in identifying parts not included in this manual.

ALWAYS HAVE READY:

- 1. Model and serial number of machine when ordering **1** parts.
- 2. Model and serial number of engine when ordering engine parts.
- 3. Item part number(S), description, and quantity.
- 4. Company name, address, zip code, and purchase order number.
- 5. Preferred method of shipping.

REMEMBER – You own the best. If repairs are needed, use only purchased parts from authorized k distributors.

3. ASSEMBLING INSTRUCTIONS

UNPACKING

- 1. Remove the unit and all components from its shipping crate. You will see:
 - Preassembled Rammer

FINAL ASSEMBLING

Rammers are shipped completely assembled almost for immediate use; just lubricants and oil are needed to start the engine.

Note: All installation hardware must be inserted into its respective location on the equipment, see parts explosion for more details.

1. Using appropriated equipment, bring the unit to the ground from its shipping pallet.

Warning: failure to use proper lifting equipment could cause the equipment to fall and cause serious injury.

4. SAFETY PRECAUTIONS

READ AND STUDY THE FOLLOWING SAFETY INFORMATION BEFORE ATTEMPTING TO OPERATE THIS EQUIPMENT. IN ADDITION, ENSURE THAT EVERY INDIVIDUAL WHO OPERATES OR WORKS WITH THIS EQUIPMENT IS FAMILIAR WITH THESE SAFETY PRECAUTIONS.

WARNING - LETHAL EXHAUST GAS!

An internal combustion engine discharges carbon monoxide, which is a poisonous and odorless invisible gas. Death or serious illness may result if inhaled. Operate only in an area with good ventilation, **NEVER IN A CONFINED AREA!**

WARNING - DANGEROUS FUELS!

Use extreme caution when storing, handling and using fuels - they are highly volatile and explosive in the vapor state. Do not add fuel while engine is running. Stop and cool the engine before adding fuel.

DO NOT SMOKE WHEN REFUELING!

SAFETY GUARDS

It is the owner's responsibility to ensure ALL GUARDS AND SHIELDS are in place and in working order.

IGNITION SYSTEMS

Breakerless magneto and batteries ignition systems **CAN CAUSE SEVERE ELECTRICAL SHOCKS**, avoid contact with these components or their wiring.

SAFE DRESS

DO NOT WEAR loose clothing, rings, wristwatches, etc., near machinery.

NOISE PROTECTION

Wear O.S.H.A. specified hearing protection devices.

FOOT PROTECTION

Wear O.S.H.A. specified steel tip safety shoes.

HEAD PROTECTION

Wear O.S.H.A. specified safety helmets.

EYE PROTECTION

Wear O.S.H.A. specified eyes shields, safety glasses, and sweat bands.

DUST PROTECTION

Wear O.S.H.A. specified dust mask or respirator.

OPERATOR

Keep children and bystanders off and away from the equipment. Only trained Operators who fully understand its safety operation must use this equipment.

For details on safety rules and regulations in the United States, contact your local Occupational Safety and Health Administration (O.S.H.A.) office. Equipment operated in other countries must be operated and serviced in accordance and compliance with any and all safety requirements of such country. The publication of these safety precautions is done for your information does not by the publication of these precautions, imply or in any way represent that these are the sum of all dangers present near equipment. If you are operating a unit it is your responsibility to insure that such operation is in full accordance with all applicable safety requirements and codes. All requirements of the United States Federal Occupational Safety and Health Administration Act must be met when operated in areas that are under the jurisdiction of that United States Department.

5. SAFETY NOTICE & DECALS

The "SAFETY ALERT SYMBOL" is used to call attention to items or operations that may be dangerous to those operating or working with this equipment. These symbols can be found throughout the manual and on the unit itself. Please read these warnings and cautions carefully.

READ SAFETY DECALS CAREFULLY

Carefully read and follow all safety decals. Keep them in good conditions. If they become aged, replace as required. If repainting, **REPLACE ALL** decals. Decals are available from your authorized Texas Distributors. Decals are not shown to scale.

201155

201157

The "SAFETY ALERT SYMBOL" is used to call attention to items or operations that may be dangerous to those operating or working with this equipment. These symbols can be found throughout the manual and on the unit itself. Please read these warnings and cautions carefully.

READ SAFETY DECALS CAREFULLY

Carefully read and follow all safety decals. Keep them in good condition. If they become aged, replace as required. If repainting, **REPLACE ALL** decals. Decals are available from your

authorized Tk Distributors. Decals are not shown to scale.

SAFETY PRECAUTIONS

1 DANGER

EXPLOSION HAZARD

Never operate the machine in an explosive atmosphere, near combustible materials or where ventilation does not clear exhaust fumes.

I WARNING

BURN HAZARD

Never come into contact with the engine or muffler when engine is operating or shortly after it is turned off. Serious burns may occur

I CAUTION

MOVING PARTS

Before starting the machine ensure that all guards and safety devices are in place and functioning properly.

I CAUTION

MACHINE DAMAGE

Advance cutter depth in small increments to avoid premature wear or damage.

! ATTENTION

READ OWNERS MANUAL

Read and understand operator's manual before using this machine. Failure to follow operating instructions could result in serious injury or death.

6. BEFORE OPERATING

- **REMEMBER!** It is the owner's responsibility to communicate information on the safe use and proper operation of this unit to the operators.
- Before operating, review SAFETY PRECAUTIONS listed on page 6 of this manual.
- Familiarize yourself with the operation of the unit and confirm that all controls function properly BEFORE starting engine.
- Locate the killing switch and assure you know how to STOP the unit.
- Make sure hands, feet, and clothing are at a safe distance from any moveable parts prior to starting.
- ♣ Shrouds and guards are provided to protect the operator or structures in close proximity to rotating hot engine parts. It is the RESPONSABILITY OF THE OPERATOR to see that they are properly in place. NEVER operate this equipment without a guard.
- ♣ OIL LEVEL Check the oil level in the engine. For more information see "Lubrication" under the engine "Owner's Manual" the "Maintenance" section of this manual. <u>All</u> Equipment come without oil, running an engine without lubrication may damage the engine.
- AIR CLEANER Check to ensure elements are in good condition and properly installed.
- Review every decal with the OPERATOR.
- FUEL SUPPLY Engines on equipment require an automotive grade of clean, fresh, unleaded or regular gasoline. All equipment's come without gasoline and oil.
- ♣ FUEL FILTER Check to ensure element is in good condition... Replace if it is clogged or damaged.
- ♣ SPARK PLUG (GAS UNIT) Check and clean spark plugs regularly. A fouled, dirty or carbonated spark plug may cause difficulties starting and poor engine performance. Set spark plug gap to recommended clearance. Refer to engine manual.
- ♣ POSITION The only operating position for this grinder is at the rear of the equipment.
 If the operator must leave this position the engine must be shut down.
- ♣ SPECTATORS Keep all personnel/spectators away from the Grinder while running. This spinning equipment can throw segments and can cause injuries.

7. STARTING ENGINE/AIR

IMPORTANT

Engine warranty is void if the engine is run without oil.

GAS ENGINE

- 1. With the Plate Compactor engine level in the ground check oil level and add oil and fuel as required.
- 2. Pull the stop switch on the unit to its "Out" position.
- 3. Move the engine throttle control to the "FAST" position.
- 4. Choke the engine if necessary. (You may not need to choke a warm engine)

BEFORE STARTING ENGINE MAKE SURE ALL GUARDS ARE IN PLACE.

- 5. Pull the starter string.
- 6. After the engine starts, move the choke lever to the open position, move the throttle level to the "IDLE" position and let the engine warm-up for one or two minutes.
- 7. To stop the engine, make sure to let the engine idle before stopping by using the crank lift handle to raise the grinder cutters height.
- 8. Push in the engine stop switch on the equipment.
- 9. Close the fuel valve.

ELECTRIC MOTOR

- 1. With the cage in maximum raised position, plug the motor into a suitable power source.
- 2. Move the switch on the motor to the "ON" position.

STOP THE ENGINE OR ELECTRIC MOTOR BEFORE:

- Adding fuel.
- Leaving equipment unattended for any amount of time.
- Making any repairs or adjustments to the unit.
- Lifting/Transportation.

8. OPERATION INSTRUCTIONS

This machine is fitted with a centrifugal clutch. This allows the engine to run at idle without driving the power transmission gears. As the engine speed is increased, the clutch will engage and the engine will drive the power transmission gears.

- 1. To avoid damage to the centrifugal clutch, move the throttle lever quickly from the L to H position. For correct operation, the engine speed should be set to maximum.
- 2. Avoid operating the machine on a fully compacted, hard, or non-yielding surface. Otherwise, the power transmission gears will be damaged and the life of the machine will be greatly reduced.
- 3. When working in a narrow trench, if the ramming shoe should get caught between the walls of the trench, the rammer may miss-strike and can be severely damaged. The ramming shoe may especially be damaged severely.
- 4. Be sure that the rammer is steered only with the handle. It should only be pushed. The rammer must not be pressed into the materials being compacted. Excessive pressure on the operating handle will lead to the unsatisfactory compaction due to the fact that the jumping action is hindered.

NEVER FORCE THIS EQUIPMENT INTO THE SURFACE TO A POINT WHERE THE EQUIPMENT STARTS BOUNCING

- 5. If the power source fails, raise the compactor off of the floor. Disconnect power source, inspect accessories for damage. Replace damage (or questionable) accessories before re-staring the equipment.
- 6. When transporting the rammer, disconnect or kill the power source before lifting or removing any guard.
- 7. When hosting or lifting rammer, always inspect frame and attaching hardware for damage before lifting. Use proper safer hoisting and lifting equipment to prevent injuries.

Operation at High Altitude

For continuous High-Altitude operation above 1,000m (3,000FT), it will be necessary to change the engine main jet to a type that will allow for correct fueling of the engine. Otherwise, the unit will suffer from a lack of engine power and not work correctly.

9. SERVICE INSTRUCTIONS

- Never service or lubricate the unit engine while running.
- ♣ After servicing the unit, restore and fasten all guards, shields, and covers to their original positions.
- Never drain oil into the ground, into open streams, or down sewage drains.
- ♣ Keep air filter clean at all times. Wash away dust and debris using anon-oil based cleaning solvent. Let the filter dry before re-installing.

WHEN LIFTING/LOWERING ALWAYS:

- 1. Set the machine in an upright position.
- 2. Stop the engine or electric motor.
- 3. Secure hardware on the machine.
- 4. Make sure you use appropriated lifting equipment to lift equipment.
- 5. Do not position yourself where you could possibly be pinched / caught between the equipment and some other obstacle.

TOWING

- 1. Do not tow the unit with another vehicle. This equipment may be damage if towed.
- 2. The rammer may be moved vertically by 2 people, or laid only on the Transport Rollers.

STORING

- 1. Drain fuel tank.
- 2. Run the engine until the fuel in the injection system is completely consumed.
- 3. Clean drive shaft, threats. Coat parts with grease.
- 4. Lube all bearings
- 5. Empty water system
- 6. Clean all moving parts with WD-40 lubricant.
- 7. Lower unit completely.
- 8. Cover unit for protection.

ENGINE

See engine owner's manual maintenance schedule.

RAMMING CYLINDER

Check oil level in crankcase of engine and replenish as necessary. Check the oil level in the ramming cylinder according to the following procedures:

- 1. Make sure that the machine has not been run in the last 10 minutes.
- 2. Set the machine on a level surface and remove the oil plug.
- 3. The top surface of the oil must be seen just below the lower rim of the hole on the oil sight glass. Replenish as necessary.

CARE SHOULD BE TAKEN NOT TO OVERFILL /OVER PUMP THE RAMMER WITH OIL/GREASE. OVERFILLING WILL CAUSE EXCESSIVE LOAD ON THE ENGINE, WHICH MAY RESULT IN POOR OR IRREGULAR VIBRATION.

10. MAINTENANCE SCHEDULE

1. Check all hardware after the first 5 hours of use, the follow the maintenance schedule.

Maintenance Services Intervals		After every use	After 45 days or 50 hrs.	Every 3 months or 100 hrs.	Every 6 months or 200 hrs.	Every 9 months or 300 hrs.	Every 12 months or 400 hrs.

11. REPLACEMENTS

Parts

Tolerance or Replacement Cycle

Engine Components	✓	Refer to your engine manufacturer's Owner's Manual
<u>Rubber Isolators</u>	✓	Replace rubber isolators if you see damage or cracks before using the rammer.
<u>Clutch</u>	✓	If clutch is slipping, dismantle clutch assembly, clean shoe and drum with proper solvent. Replace clutch shoe if necessary.
<u>Hardware</u>	✓	Re-torque all bolts after the first eight hours of operation and check hardware every 25 hours. Replace any worn or damaged hardware as needed. Replacement hardware should be grade 5 and zinc plated.
<u>Safety Decals</u>	✓

13. WARRANTY

THIS IS YOUR WARRANTY - PLEAE READ AND SAVE

- **1. TK Equip** warrants each new machine against any manufacturing defect in material and workmanship under normal use and service for a period of (1) one year. Warranty period begins on first day of use by end user. This first day of use is established by the date of a completed warranty card or a bill of sale to the end user.
- **2.** The obligation under this warranty is limited to the replacement of parts at your **TK Equip** factory branch or on an authorized **TK Equip** distributor.
- **3.** Machines altered or modified without a **TK Equip** written consent may void this warranty policy immediately. Misuse, negligence, accidents or the operation of the machines in any other way that the recommended by **TK Equip** operation procedures, will void this warranty policy. This warranty shall not apply to machines repaired by other than authorized **TK Equip** branches or distributors.
- **4.** The cost of transportation and other expenses related are not covered by this warranty.
- **5.** Written authorization for the return of merchandise under warranty must be obtain from **TK Equip** customer service contact. All equipment & parts returned may be sent with a signed RGA (Return Goods Authorization) for its follow up.
- **6. TK Equip** reserves the right to inspect and render the final decision on each warranty case.
- **7. TK Equip** reserves the right to improve or make product changes without incurring any obligation to update, refit or install on machines previously sold.
- **8. TK Equip** is not responsible for any liability, damage or injury directly or indirectly from the design, material or operation of its product.
- **9.** The warranty letter must be returned to **TK Equip** within 10 days after purchase/adquire, for a first use failure warranty claim.
- **10.** Warranty request must be submitted in written within 30 days after machine failure to **TK Equip** customer service.
- 11. THE FOREIGN WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING THE WARRANTIES OF MERCHANT ABILITY AND FITNESS FOR USE AND OF ALL OTHER OBLIGATION OR LIABILITIES ON OUR PART, AND WE NEITHER ASSUME NOR AUTHORIZE AINES, MOTOR AND THEIR COMPONENTS.NY OTHE RPERSON TO ASSUME FOR US ANY OF OUR PRODUCTS. LIKEWISE, THIS WARRANTY

14. WAREHOUSE LOCATIONS

REMEMBER - you own the best. If repairs are need use only parts purchased from a authorized distributor.

Has established a network of reputable distributors with trained mechanics and full facilities for maintenance and rebuilt, and to carry an adequate stock parts in all areas of the country, their sales reps & engineers are available for professional consultation. If you cannot locate your distributor contact our sales branch listed below.
